Calvin Caesar

FULL-STACK DEVELOPER

calvincaesar777@gmail.com | https://calvincaesar.com

Experience / Project

AI powered Android App – Asterisk   **May – Jun 2024**

- Deployed a machine learning Android app performing ABSA using a custom NLP model on Google Cloud Platform (GCP)
- Designed and deployed a fully serverless backend using Google Cloud Run and Firebase to achieve auto-scaling and reduced infrastructure costs
- Developed Python-based NLP preprocessing logic for TensorFlow.js using Google Cloud Function
- Implemented RESTful API integration between frontend, backend, and third-party services

Leadership / Program

Bangkit led by Google, Goto, and Traveloka   **Feb – Jul 2024**

- Completed 900+ hours of curated training in Cloud Computing and Soft Skills
- Gained practical experience in backend development, deployment, and cost optimization on GCP
- Collaborated with a cross-functional team that consists of Cloud, Mobile, and ML to deliver a production-ready application as part of the Capstone project.

Leadership & Organizational Involvement   **Sep 2021 – Oct 2024**

- Served in multiple leadership and operational roles across 3 organizations over 3 years (Finance Group of IBIKKG, Informatics Community, BPM)
- Three years of active roles in campus organizations that includes leading a 350+ attendee financial seminar, UI/UX webinar, and new student orientation event, etc.

Education

Institut Bisnis dan Informatika Kwik Kian Gie   **Oct 2021 – Mar 2025**

Bachelor in Information Systems | GPA: 3.83/4.00
